COATZADRONE USA LLC

Pilot Onboarding & Operations Guide

"Aerial Intelligence for a Smarter World."

Welcome Message

Welcome to Coatzadrone USA — a growing nationwide network of skilled drone professionals. Our mission is to deliver consistent, high-quality aerial data for renewable energy and industrial clients across the United States. This guide outlines the standards, procedures, and expectations for all Coatzadrone USA pilots.

Pilot Requirements

• FAA Part 107 certification (active)
• Liability insurance (recommended)
• Experience with thermal and mapping operations
• Reliable transportation and field readiness
• Professional conduct on all client sites

Equipment Checklist

■ Thermal-capable drone (DJI Mavic 3T, M2EA, or equivalent)
■ At least two charged flight batteries
■ Tablet/controller with mission software
■ SD cards (64GB minimum)
■ PPE (vest, safety glasses, boots)
■ Vehicle power inverter (recommended)

Flight Operations Standards

• Follow Coatzadrone USA's SOPs and site-specific mission plans
• Conduct pre- and post-flight checks
• Confirm flight paths and safety zones with site contact
• Maintain VLOS and comply with FAA airspace rules
• Report any incidents immediately

Safety & Compliance

• Comply with all FAA Part 107 regulations
• Maintain safe operations at all times
• Follow site safety briefings and respect restricted areas
• Avoid flying over personnel, roads, or unauthorized zones
• Operate only in safe weather and visibility conditions

Data Handling & Deliverables

• Upload all thermal and RGB data within 24 hours of flight completion

• Organize folders by project name and date

• Verify all data before upload

• Maintain confidentiality — no sharing or posting of client data

Compensation & Invoicing

• Standard rate: **$500/day per project**

• Payment issued upon verified data submission

• Submit invoice via email or portal including:

- Site Name

- Flight Date

- Hours Worked
